Highly driven Lead Engineer with 6+ years' experience architecting scalable, high-performance web applications. Proven track record of reducing load times by up to 40%, mentoring cross-functional teams, and streamlining CI/CD pipelines to accelerate release cycles. Passionate about clean code, data-driven decision making, and continuous delivery of exceptional user experiences.

EXPERIENCE

---

lobstr • *remote*

Lead Engineer *August 2026 - October 2026*

1. Guiding the engineering team, owning technical direction, architecture decisions, and delivery quality across the core platform.

2. Lead and mentor a team of frontend and backend engineers, setting coding standards, running code reviews, and growing engineers' technical skills.

3. Established a weekly team alignment process, improving sprint visibility, cross-functional communication, and delivery predictability.

4. Continue hands-on contributions across the stack (React/Next.js, Node.js, PostgreSQL) while partnering with leadership on the team's technical roadmap.

Senior React Engineer *March 2023 - August 2026*

1. Spearheaded the migration to Next.js, cutting initial page load times by **40%** and boosting Core Web Vitals scores into the top 5% of industry benchmarks.

2. Architected and maintained RESTful APIs in Node.js/Express, handling **more than 200K** requests per day with 99.9% uptime.

3. Established a mentorship program for 3 junior engineers, resulting in a **50%** faster onboarding ramp-up and improved code quality.

4. Designed and rolled out CI/CD pipelines, slashing deployment time from 45 to **10 minutes**.

5. Partner with product managers, UX designer to deliver 3 major feature releases per quarter, consistently ahead of schedule.

React Engineer *August 2020 - March 2023*

1. Built and maintained responsive UIs with React, Redux, and hooks—achieving a **25%** reduction in user bounce rate.

2. Implemented code-splitting and lazy loading strategies, improving Time to Interactive by **30%**.

3. Collaborated with UX designer to introduce A/B testing workflows, driving a **15%** uplift in feature adoption rates.

4. Integrated third-party payments and analytics services (Stripe, Google Analytics), supporting a **30%** increase in monthly transactions.

Python Data Engineer *January 2020 - August 2020*

1. Developed robust ETL pipelines to process **more than 5 million** records daily, ensuring data latency under **2 hours**.

2. Redesigned relational schemas in PostgreSQL, improving complex query performance by **60%**.

3. Partnered with data science teams to deploy machine learning models in production, contributing to a **20%** boost in customer retention via personalized insights.

Megatherium ***• remote***

Application Engineer *May 2022 - December 2022*

1. Engineered serverless React applications on AWS (Lambda, API Gateway), achieving **99.8%** service availability.

2. Diagnosed and resolved critical performance bottlenecks under load, reducing error rates by **75%**.

3. Converted Figma mockups into pixel-perfect, mobile-first components—improving UX satisfaction scores by **18%**.

4. Documented technical solutions and best practices in Confluence, shortening troubleshooting time across the team.

TECHNICAL SKILLS

Frontend: React, Next.js, Redux, JavaScript (ES6+), TypeScript, Vite, Jest, Cypress
Backend: Node.js, Express, Python, Django, RESTful APIs, Strapi CMS

DevOps & Cloud: Docker, Jenkins, AWS (Lambda, S3, RDS), CI/CD pipelines
Data & Performance: ETL pipelines, PostgreSQL, SEO & performance optimization

Collaboration: Agile/Scrum, Git, Figma, A/B Testing, Mentorship

EDUCATION

Bachelor of Science in Applied Computer Technology September 2015 - April - 2020
United States International University - Africa
